¹Lets talk about Artificial Intelligence\n\nIn fact, ²it's possible to create an AI that's smarter at the things that make us happy, like cooking, writing, doing math, or interacting with people.\n\nAnd that's true for most people.³ But there is an exception – people like Elon Musk, John Carmack, and Craig Venter, who can create artificial intelligence ⁴that will help them achieve these goals.\n\nBut here's the problem: artificial intelligence will ultimately kill us, and AI will probably be smarter than humans.\n\nNo.\n\nAnd this is why artificial intelligence is something that's going to take decades.\n\nNot tomorrow, but decades from now, most of the AI capabilities that exist today will be obsolete.\n\nBut ⁵there are many technologies that have the potential to ⁶make AI more useful in our everyday lives. ⁷They're ⁸already being developed, and we'll all eventually learn to love them.\n\nAnd this is why we should worry about artificial intelligence.\n\nLet's talk about AI for a second\n\nIt's a simple rule of life. If someone is a genius, they're always going to be better than you.\n\nEven if you're a complete idiot.\n\nSo that doesn't mean AI is going to be better than humans.\n\nIt only means it's going to be better than us.\n\nAnd it will not be any time soon.\n\nAnd the reason is simple: we don't have the technology today to even think about it.\n\nWe have a lot of AI capabilities that we think are important, ⁹but at the ¹⁰moment we don't understand how to make them useful.\n\nSo until we figure that out, we'll never have the AI we need to live a more fulfilling life.\n\nSo what does that mean for us?\n\nWell, when these technologies become important, they're going to change everything.\n\nThe way you think, the way you behave, the way you do your tasks will all be different.\n\nIf you take away our ability to imagine

the future, then the world around us ¹¹is going to change drastically.\n\nWe will be able to create AI that makes us more like ¹²the machines.\n\nAnd if you think that's all good, then I have a bridge to sell you.\n\nBecause AI is going to make us even more like the machines.\n\nSo what does that mean for you?\n\nIt means it's going to take time for you to become better than you are now.\n\nAnd if you do your job better, sooner than ¹³later ¹⁴you're going to be able to enjoy that better life.\n\nI know, it's scary.\n\nAnd it's true.\n\nBut there's so much to this life.\n\nLike this.\n\nDo you want to do more with your life?\n\nIs there a way to give yourself that much more pleasure?\n\nWhat's your best bet to make the best of it?\n\nI've done it.\n\nI've created some of my ¹⁵favorite ¹⁶work.I've changed my life in more ways than you can imagine.\n\nAnd I'll continue to do this.I will ¹⁷make sure that the opportunities are out there.\n\nAnd I will find you.\n\nYou, my friend, will be the one who makes this happen.\n\nBecause we ¹⁸really do have the power to change the world.\n\nWe do.\n\nWe see the world differently each day.\n\nAnd we can do it.\n\nWe can make it better.\n\nAnd we can do it together.\n\nI know it's scary.\n\nI know you're scared.\n\nBut I am scared.\n\nAnd if you're scared, think about it this way.\n\nThere is no such thing as too many humans.\n\nWe are the product of thousands of individuals, and they love us because, in the end, we are humans.\n\nAnd they love us because we are human.\n\nAnd we are beautiful.\n\nAnd we are unique.\n\nAnd we do things no other being can do.\n\nAnd we are the future.
